### How does it work on the day?

If you are thinking — Will I have to say anything? Do they want to sell me anything? — relax. The approach we use allows you to be as private or as contributing as you want to be.

Each session normally consists of three steps:

- Individual thinking time — key questions to enable reflection, appreciation, extrapolation
- Pairs sharing time — in-depth discussion to further develop your thinking and insights
- The whole group then reflects on the insights etc that people volunteer to contribute.

We facilitate dialogue on issues people care about. We do not have any commercial ties, are not promoting or selling anything. We're not pushing a particular view. It's your show.
